

## **BROW LAMINATION FAQ:**

### **What Is Brow Lamination?**

Brow Lamination Is A Noninvasive Procedure And A Semipermanent Solution For Eyebrows That Lack Shape, Do Not Have Symmetry, Where The Hairs Follow A Different Pattern Or Have Sparse Areas. With Lamination We Realign The Direction Of The Natural Brow Pattern In Such A Way To Give You The Desired Shape: A Fuller, Fluffier And A Stylistic Appearance With One Simple Appointment.

### **Who Is Brow Lamination For?**

Anyone Looking To Improve The Overall Look Of Their Brow; With Sparse Brows; Who Are Growing Out Their Brows; Not Ready To Commit To Cosmetic Tattoo; With Unruly, Coarse Brows; With Stubborn, Natural Hair Growth Patterns; Men.

### **Are There Any Reasons Why Brow Lamination May Not Be Advisable To Me?**

Contraindications For Brow Lamination Include But Are Not Limited To: Psoriasis/Eczema; Recent Eye Surgery; Alopecia; Recent Permanent Make Up (Must Be Healed By 6 Weeks); Sunburn; Ultra-Sensitive Skin; Blood Thinners; Pink Eye; Pregnant/Nursing; Retinol, Accutane, Aha, Bha Etc; Naturally Curly Brows.

## **LASH LIFT FAQ:**

### **WHAT IS A LASH LIFT?**

A Lash Lift is a semi-permanent treatment that lifts your natural lashes to create beautifully curled lashes without having to use an eyelash curler before mascara. It is a revolutionised procedure from the old, inadequate

perming techniques, we use silicone pads instead of perm rods. It is a great alternative to eyelash extensions, as it requires very little maintenance.

This Is A Great Alternative To Eyelash Extensions!

## **What Is The Difference Between Eyelash Extensions And A Lash Lift?**

Eyelash Extensions Require A Single Or Multiple Synthetic Lash/Es To Bond To Each Individual Natural Lash To Create More Length And Fullness And Require Maintenance Every 2-3 Weeks. Whereas A Lash Lift Is Just Curling Your Own Natural Lashes With Less Maintenance

## **Who Is Suitable For A Lash Lift?**

Your Natural Lashes Should Have Adequate Length.

Straight And/Or Downward Pointing Lashes

Low Maintenance Compared To Eyelash Extensions As Time Poor For Regular Upkeep

Love To Still Wear Mascara

## **Who Is Not Suitable For A Lash Lift?**

- Short And Sparse Lashes As The Effect Really Isn'T Noticeable At All.
- If You Can'T Lay Still Or Claustrophobic And Canâ€™T Keep Your Eyes Closed For Up To 60 Min Then This Treatment Is Not Suitable
- Trichotillomania Or Simple Terms If You Have A Habit Of Pulling Out Of Lashes And/Or Brows.

- Can'T Help Constantly Rubbing Your Lashes Or Sleeping Face Down Into Your Pillow
- Chronic Dry Eye
- Not Recommended For Radiotherapy/Chemotherapy Clients (Should Wait At Least A Year From Your Last Treatment).
- Recently Had Blepharoplasty Surgery - Most Will Experience An Increased Sensitivity In The Eye Area For Quite A While. You Need To Give Yourself That Time To Heal First. After That, You Can Consult With Your Physician To Be Sure. Recommended To Wait At Least A Year.
- Recently Had Lasik Surgery - You Will Need To Wait For At Least 6 Months Before You Can Have A Lash Lift. But Always Consult With Your Treating Doctor Before Going Ahead With The Treatment.

There May Be Other Conditions/Treatments/Medications That You'Re On/ Have That Can Affect The Lift But May Be Discussed With Your Health Care Professional.

### **What Are Contraindications:**

A Sign That Someone Should Not Continue With A Particular Medicine Or Treatment Because It Is Or Might Be Harmful.

It Is Impossible To List Every Potential Risk/Complication, But Below Are Some Of The More Common Ones Recognised For A Lash Lift And Must Be Disclosed Prior To Any Treatment:

- Eye Infections/Disorders

- Recent Eye Surgery Within 6 Months (Always Consult Your Doctor Before Going Ahead With Any Treatment That Can Affect You)
- Allergy To Product
- Very Sensitive Eyes
- Hay Fever Sufferers/Watery Eyes
- Conjunctivitis
- Styne
- Dry Eye Syndrome
- Medication Thyroxin (In Some Cases Can Prevent Lashes From Curling)
- Contact Lenses Must Always Be Removed
- Using Prescribed Medicated Eye Drops
- Pregnancy During The 1St Trimester

### **Preparation Before Treatment**

Must Have No Eye Makeup On Upon Arrival. Please Be Aware That Using Waterproof Makeup Can Affect The Lash Lift. So Do Not Wear These Formulas At Least 2 Days Beforehand.

Arrive To Your Appointment On Time. Or If You Need To Take The Makeup Off Just Before Your Appointment As Your Coming Straight From Another Errand You Should Arrive At Least 5 - 10 Min Beforehand.

If You Wear Contacts, It Must Be Removed For The Treatment. So Please Bring A Spare Or Glasses With You.
